New SOFT SEALER

It is the best soft sealer suitable for a small amount of bag stuff work in the factory or at the shop. The sealing work can easily be done, thanks to a compact designed machine, which needs minimum space.

SOFT SEALER

200EN 300EN 200ENW 300ENW

The seal can be simply done by putting the bag and pushing the table slightly.

Slight Push, Strong Seal

Our newly developed mechanism makes possible to get much more sealing pressure than before. By this reason, it contributes to seal well for the film and gazette, which were difficult to seal in the past.

Compact design that doesn't choose location

Indispensable "compact" was pursued to the desk-top seal machine.

Made of aluminum that keeps fine sight

Aluminum molding body, which does not rust or smear. The fine sight is firmly kept indefinitely.

Applications

200EN · 300EN	[General wrapping] Confectionery · Foods · Industrial Parts
200ENW · 300ENW	[Oxygen scavenger] Tea Bags · Coffee Bags · Gusset Bags
